GENERAL BIBLIOGRAPHY ON

NEIGHBORHOOD THEORY, URBAN SOCIOLOGY AND

COMMUNAL ALTERNATIVES

by

Department of Urban Planning and Development
Cornell University

This bibliography is intended as a resource for students in this course and for students of neighborhoods in general. I have tried to select works which link standard approaches to urban sociology with the specialized work in the social-psychology of the urban neighborhood. Using this as a base I have attempted to compile a fairly complete bibliography on communes, counter-culture and philosophical critiques of contemporary American society and the organizational alternative to it.

I have concentrated almost exclusively on works which have been published in standard sources. I have attempted to collect all books of readings relevant to the area.

IV. Organization at the Neighborhood Level
This section will cover general theory of locally bound, geographic
units from empirical and theoretical viewpoints. Since the neighbor-
hood is responsible for delivering family services, sections of
child rearing, family and marriage are also included.

V. The Communal Alternative
This section will examine "intentional communities." Intentional
communities are important to study because they can serve as models
for urban planning. It is not my intention to advocate a general
movement to communes. If we can understand the drive towards
communes and the reasons for communal success and failure we will
have an important clue regarding neighborhood planning.

VI. The World and the City in the 1970's: General Social Theory
It is impossible to study urban neighborhoods outside of the context of the general society. The works in this section explore the changing pressures and demands placed on the individual in urban society. Since the urban neighborhood is the final point of comsumption for much of what we call "quality of life" it must absorb the main impact of these changes.
